INTERNATIONAL EXPANSION

Microsoft Cloud - Azure

SITUATION

The Cloud Computing Strategy introduces an approach to move the Company from the current state of a duplicative, cumbersome, and costly set of application silos to an end state which is an agile, secure, and cost effective service environment that can rapidly respond to changing business needs. The hype around cloud services can make it difficult to know where to start and to understand the real benefits they deliver.

The Cloud Computing Environment is a robust and resilient enterprise that delivers faster, better informed collaboration and decisions enabled by secure, seamless access to information regardless of computing device or location. Every business is unique. That's why the Cloud can be tailored to meet the needs of any enterprise. It's the cloud that turns massive streams of data into insight, helps drive unparalleled productivity, and transforms a mobile workforce into a connected team, and scales rapidly to meet your needs. This is one flexible cloud.

OUR CLOUD PORTFOLIO

To find out how a Cloud Strategy and Cloud Concepts can add the most value to your business:

- ▣ We bring proven assets like our Cloud methodology, assessments and accelerators
- ▣ Cloud enterprise architecture and a market leading IT operating model
- ▣ Our teams bring skills in implementing all areas of the Cloud, from public and private infrastructure Clouds to platform and software-as-a- service(SaaS)
- ▣ Whether you're just starting out, have already moved some applications to the Cloud, or want to explore more groundbreaking uses of Cloud, we can bring it all together in a well-defined, cost effective Cloud strategy
- ▣ We start with a customized Cloud Workshop to identify current and future needs

Service Models

Cloud computing includes services according to the following several fundamental models:
